NIST-1476a	Branched Polyethylene Resin	12 g
The certified values delivered by this Standard Reference Material (SRM) are intended for use in calibration and performance evaluation of instruments used in polymer technology and science for the determination of the Melt Flow Rate using ASTM D1238-13.		
This material is certified for Melt Flow Rate using ASTM D1238-13 condition 190/2.16 Under this condition the melt flow rate is 1.23 g/10 min with a standard deviation of 0.036 g/10 min and with 29 degrees of freedom.		
The certified measurement uncertainty is found to be 0.110 g/10 min and is expressed as a combined expanded uncertainty with a coverage factor $k = 2$, calculated in accordance with ISO Guides .		
Type A and Type B contributions to the expanded uncertainty include the standard deviation of the Melt Flow measurement, instrument-to-instrument variation as discussed in ASTM D1238-13, operator dependence of the measurement, and temperature gradients in the apparatus.		
These values are traceable to the International System of Units (SI) unit for mass.
